### **Cimulus Awarded EPA MOVES Computer Model Development Contract**

Ann Arbor, MI -- January 20, 2005 -- Cimulus, Inc., has been awarded contract MOVES Computer Model Development (PR-CI-04-11112) by the US EPA. The contract will allow Cimulus to provide technical software development support for EPA's Office of Transportation and Air Quality (OTAQ) current series of air emission estimation models.

Although Cimulus' primary focus is on the commercial manufacturing sector, the company has been awarded several federal contracts for the US EPA over the past five years. These contracts, which have all been related to the OTAQ, have involved the design and development of extremely large and complex data modeling and simulation systems.

This contract includes one base year and up to two option years, with a maximum value of over one-half million dollars. Cimulus was also recently awarded a second contract with the EPA for a separate but related system known as NONROAD, and the company hopes to continue to grow this aspect of its business.

### **About Cimulus**

Based in Ann Arbor, Michigan, Cimulus provides on-demand programming and IT services, focusing on applications for business and manufacturing. Cimulus specializes in fast, high-quality programming for Windows and the Internet, including highly technical and challenging systems.
