Cimulus Signs Design Agreement with NSK

Ann Arbor, MI -- May 12, 2005 -- Cimulus, Inc., has been awarded a contract with NSK Americas to provide technical design services in support of a multi-stage update to its TeC Web site. The overall project includes the adaptation of a web services architecture to the site, which will facilitate the sharing and management of engineering information between NSK's sites worldwide.

About Cimulus

Based in Ann Arbor, Michigan, Cimulus provides on-demand programming and IT services, focusing on technical applications for manufacturing and business. Cimulus specializes in fast, reliable, and high-quality programming for Windows and the Internet, but also provides custom training and consulting for a variety of platforms and technologies.

About NSK

NSK Americas is the U. S. subsidiary of NSK Ltd, a major manufacturer of bearings and bearing related products. NSK Ltd inaugurated its business in 1916 and produced the first ball bearings made in Japan. Since then, the company has developed a full range of bearings that have sold throughout the world. NSK Ltd is now the number one bearing manufacturer in Japan and number two in the world. At present NSK has overseas sales based in 25 countries and operates more than 30 overseas plants.
