Cimulus Signs Development Agreement with Kaiser Optical Systems

Ann Arbor, MI – August 15, 2005 -- Cimulus, Inc., has entered into a software development agreement with Kaiser Optical Systems, Inc., a Rockwell Collins Company, to update an installation program for its HoloGRAMS software package. The project includes the redevelopment of an existing custom installation program to better manage the latest version of the HoloGRAMS application, which has recently been upgraded to the .NET framework.

About Cimulus

Based in Ann Arbor, Michigan, Cimulus provides on-demand programming and IT services, focusing on technical systems and applications. Cimulus specializes in fast, reliable, and high-quality programming for Windows and the Internet, as well as custom training and consulting for a wide range of platforms and technologies.
