

Features

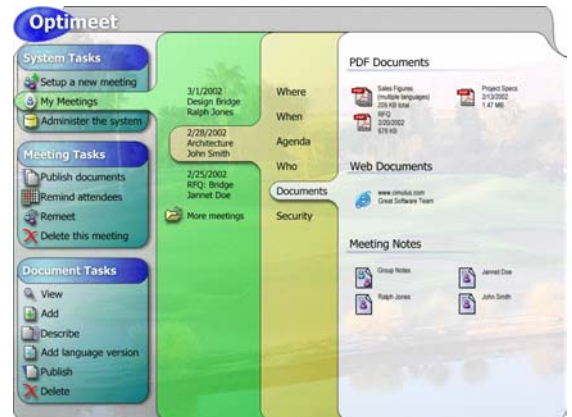

- Uses tablet computers to combine the easy interface of pen-and-paper with the benefits of a digital system
- Replaces whiteboards, printed materials, and even hand-written notes (public and private) with a single, integrated environment
- Provides quick and easy access to prior meeting materials, design notes, etc.
- Meeting diagrams, notes, and documents can be “published” to the network for easy access after the event
- Can be used for both planned or scheduled meetings as well as unscheduled sessions
- Supports a range of meeting formats, from formal presentations to collaborative or group design sessions
- Provides multiple levels of security, keeping personal notes private while allowing access to workspace diagrams and documents
- Can be installed as a dedicated system, or used “on demand” with existing tablets or laptops

Meeting Productivity and Team Collaboration Solution

THE CHALLENGE

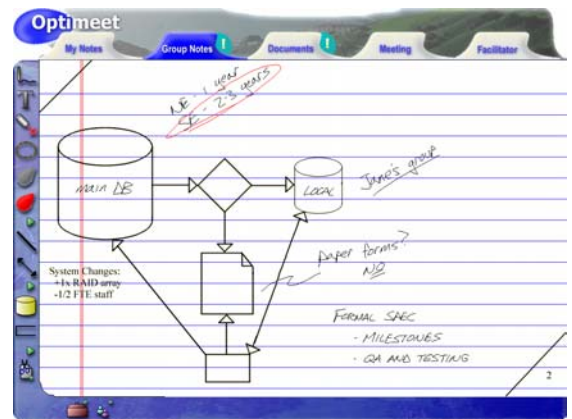

Your company’s most important decisions are made in meetings. Top executives spend most of their day in them. Project managers rely on them to keep jobs on track. The daily interaction between your employees is vital to your company’s success.

Studies have shown that improving the flow and control of meetings leads directly to more efficient and complete information sharing, less time spent, and ultimately, better decisions. If you could improve the efficiency and accuracy of virtually every important meeting in your company, how much could this improve your business?

THE SOLUTION

Optimeet, the integrated meeting system by Cimulus, is a simple and effective tool that can dramatically improve the flow and results of any meeting. By providing a single, integrated collaboration environment, Optimeet can replace the hardcopies, whiteboards, notepads, projectors, and other tools normally used.

The simple, intuitive interface is designed specifically to work for small groups meeting in person, with a short learning curve.

BENEFITS

- Reduce meeting preparation and follow-up time
- Improve collaboration by encouraging more participation
- Maintain control of meeting flow, topics, and documents
- Easily apply proven “best practices” in meetings
- Eliminate manual transcription of notes and diagrams
